SUMMARY

I am currently studying software engineering, and I am in my third year. As part of my school's mandatory internship program, I am seeking an internship to gain practical experience. Having achieved high success in my preparatory year exams, I earned a full scholarship to study in the UK. I am a student who has obtained an English certificate in the UK (New College Group, Liverpool). Thanks to my software engineering education, I possess technical skills, can easily adapt to new technologies, and aim to further develop myself through the internship experience. As a motivated student, I am always open to learning, and I am determined to perform at my best during the internship period.

EDUCATION

Bachelor's degree in Computer Software Engineering

Fatih Sultan Mehmet Vakıf Üniversitesi | January 2021

(Merit-based Scholarship)

PROJECTS

- **Hospital Management System**
  (using JAVA - Java Swing - MySQL)

- **Python Data Preprocessing Library**
  (https://pypi.org/project/rdatapp/)

- **Mini Desktop Search Engine**
  (Data Structures, Java - GUI)

CERTIFICATIONS

- **General English**
  (New College Group Liverpool)

- **Proficiency in English**
  (Eaquals)

- **JAVA ile Programlamaya Giris**
  (BTK Akademi)

- **Python | Hızlı ve Pratik Öğrenme 2024**
  (Udemy)

KEY SKILLS

- Python
- JAVA
- Java Swing
- C (Programming Language)
